

Topwin Backup

TOPWIN PROGRAM BACK-UP TO DISK

Occasionally, the TopWin software program needs to be backed up onto a disk to eliminate the risk of losing all jobs and their respective mechanical programmed positions when a CPU crash occurs. Please follow the steps below to save all the programmed information.

- 1) Using the administrative logon go to the *tools section*.
- 2) Scroll down and select Backup Database.
- 3) Insert a formatted floppy disk into drive A of the computer and select OK. Note: All files are now copied.

TOPWIN PROGRAM RECOVERY FROM DISK

- 1) Use the administrative logon.
- 2) Close TOPWIN by selecting the X on the upper right hand corner.
- 3) Click onto the start button/programs/windows explorer.
- 4) Select C drive/komax/topwin/bin.
- 5) Double click onto extended setup.
- 6) Push the reset button on back of the CPU and follow the instructions.
- 7) Select Restore from backup and insert floppy into drive A.
- 8) Press next to continue and complete the install procedure.
